

Campo Research USA Inc, proudly launches three different Cosmetic Ingredients, namely:-  
Naga Mani, as commonly known in the Indian Sub-Continent and Indo-Malaya Archipelago, or in English it's called as Cobra Pearl.  
Rudraksha Seed Oil, cold-crushed pressed oil from Rudraksha (Eye of Shiva), and  
Campo Plantservative WS, for elimination of, and prevention from Hair Scalp Fungal Infection that affects the Hair roots and retards growth of Hair.

Cobra Pearl has many unproven hearsay stories, passed down thru generations, and in the various scriptures like Garuda-Purana, and other texts, in Sub-continental Folkloric Traditions, such as: if a cobra, did not uses its venom for at least a hundred years, the venom will turn into a crystallized state (a mani / or gem), and use the mani to search for food at night. The real truth was as Cobras are the only type of snake that hunts and digest insects. As Cobras were mainly nocturnal hunters, Green Light emitting Fireflies are abundant at night, and, Cobras through their ancient genetic memory while crawling through the Summer dried river-beds, chanced upon the illumious Cobra Pearl,- a water-logged turned tiny pieces of crystal of Emerald-Flourite variety " Illuminous Chlorophane". This illumious crystals are used by the Cobras to lure the flying Green Light emitting male Fireflies, into attracting to the female green-light emitting fireflies; as the female green light emitting Fireflies do not fly and stays on the ground. The cobra pearl emits identical green light as the Fireflies.

Rudraksha, has many traditions in Hinduism, Taoism, Buddhism, Tibetism and other cultures in the Indo-Sino borders areas of Assam, Arunachal Pradesh, Himil Pradesh, Yunnan, Qing Hao, and Szechuan Provinces, in religious and folk-cultural traditions. The medical benefits are many and well described in many ancient texts. The Cosmetic Natural Ingredient here, is the Cold Crushed Pressed Pure Oil, of which is about six to twelve percent of the Rudraksha seeds. Eighty percent of the Rudraksha Seeds are of Brazilian Tropical Origin, while fifteen percent are from Indonesian, and about five percent are of Nepali origin. The Cold Crushed Pressed Oil, of which color is of dark chocolate brown color are de-colored and de-odorized in a bio-reactor containing coconut shell originated activated carbon nano-bio-filters to reduce the color and smell to at least ninety percent lesser, and, without any loss of the beneficial components.

Lonicera, honeysuckle as it is known, is a broad-spectrum bio-herbal extract, as a Food preservation in Far-East Asia, and other applied uses in Cosmetics, OTC, as natural preservation plant extract additive, as well as in Poultry Breeding and Poultry Meat processing to "total eliminate" the Campylobacter jejuni - a micro-organism that cause severe human food poisoning, when consumed of the Camylobacter jejuni contaminated poultry meats. The current new uses as Human Scalp anti-fungal and as Natural Anti-Deodorants are derived from the two In-Vitro Clinical Assessment studies, as scalp-fungal eliminating natural additive and as for eliminating of body odor causing micro-organisms.
